## Technology advisory

### Deliver on your vision with speed, precision and value at a competitive price.

Our technology advisory services provide practical solutions and straightforward guidance to help your business succeed in today's digital landscape. We work closely with you to understand your unique challenges and create strategies that make the most of your technology investments.

Our senior advisors have sat in the leadership chair themselves. They've faced the same challenges you're dealing with – from board presentations to tough technology decisions. This real-world experience means:

- **We speak the language** of business and technology.
- **We understand how and why** organisations like yours invest in technology for efficiencies and improved effectiveness.
- **We are an independent voice you can trust**, providing strategic guidance and advice forged through 25 years of technology solutions delivered for clients across six continents.

Working with us

## Combining strategic vision with hands-on delivery

Our team of senior business analysts and technology advisors, IT and solution architects brings decades of experience across industries, technologies and methodologies to accelerate your digital journey and transform your business challenges into technology-enabled opportunities:

**Digital leadership** that helps you translate strategic imperatives into actionable roadmaps delivering measurable outcomes and tangible business returns on your technology investments.

**Technical innovation** through the design of future-ready architectures driving competitive advantage and leveraging emerging technologies to solve today's problems while building platforms for capturing tomorrow's opportunities.

**Deep domain knowledge** enables us to apply sector-specific insights while cross-pollinating innovative approaches from adjacent industries in high-impact transformation areas including cloud modernisation, digital platforms, customer experience and data-driven operations.

**Experienced in applying proven methodologies and industry-standard frameworks** (TOGAF, PRINCE2, Agile) to ensure you benefit from consistent, high-quality delivery that balances governance and risk mitigation with speed and agility to create outstanding value for your organisation.

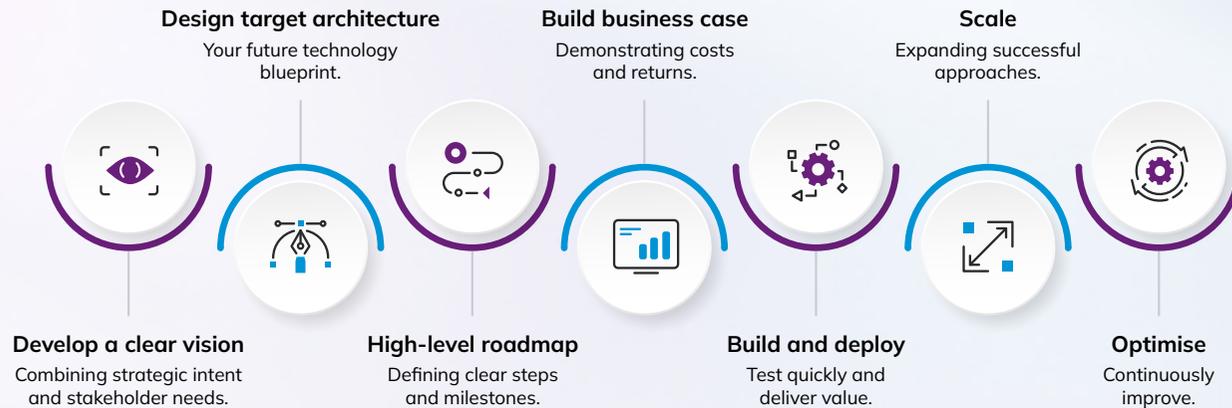

**Specialising in business transformation and value realisation**, we excel at the crucial human elements of technology change including requirements, stakeholder engagement and change management so that your solutions are not just technically sound but also widely adopted.

## From vision to value

We're with you at every step in your journey.

We start by listening – understanding your organisation's specific needs and goals. Our advisors then work with you to:

- Develop a shared vision, target architecture and roadmap.
- Create a business case by demonstrating the costs and returns.
- Build, deploy, scale and optimise.

## Collaboration, guiding principles and patterns

We are problem solvers and strategy enablers, ensuring you get the most out of your technology investments, new and old.

We cultivate regular communication through the sharing of ideas, progress updates and feedback loops. We also apply a well-defined governance model that outlines roles, responsibilities and escalation paths, so your key stakeholders know how and when to act on critical decisions. Together, we will create a plan of action that:

**Guides decision-making with architectural principles** acting as a compass, helping your teams make consistent, aligned decisions.

**Speeds up design** with a clear structure that accelerates solution modelling.

**Reduces complexity using patterns** that provide proven solutions to recurring design challenges.

**Encourages reuse** by applying principles like modularity and separation of concerns.

## The NashTech difference

When you work with us, you are partnering with advisors who:

**Provide practical explorations of the 'art of the possible'**

Acting as a trusted sounding board for your ideas.

**Go beyond technical recommendations**

Connecting technology decisions to business results.

**Help you manage complex stakeholder expectations**

Translating technical needs into language the board understands to ensure buy-in.

**Challenge conventional wisdom**

Offering honest feedback when standard approaches are not right for you.
